Frontend Development Projects

Rise Coffee (React JS):
- **Summary:** Website for a fictitious coffee business in which users can learn about the Company's origin, shop for coffee, or find locations. Users can add/remove/edit their order in their bag. Gained experience in utilizing React Hook Form and local storage for user order data.
- *Link***:** https://rachidrezzik.github.io/RISECOFFEE/

LETSTRAVEL (React JS):
- **Summary:** Website intended to inspire people to travel through providing some ideas/popular destinations across the globe. In this project, I gained more experience with React Router and managing a responsive navbar design with React.
- *Link***:** https://rachidrezzik.github.io/LETSTRAVEL/

2000-2020 Soccer Recap (React JS):
- **Summary:** Single page application recapping information/statistics over the past twenty years on the World Cup, Champions League, and Ballon d'Or.
- *Link***:** https://rachidrezzik.github.io/Soccer_Recap/

HIIT Workout App (React JS):
- **Summary:** High Intensity Interval Timer ("HIIT") in which the user can set the amount of rounds they'd like along the with the work/rest duration for each round. During the workout, the user can stop the timer, reset the work/rest duration they're on, move to the previous/next duration, restart the workout, or update the workout preferences for a new workout.
